

Methodology for Addressing RPS Questions

James Campbell
Utah Division of Air Quality

Utah Issues

- Need to address external costs

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)
- Utilities should have cost recovery

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)
- Utilities should have cost recovery
- Keep costs low for consumers

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)
- Utilities should have cost recovery
- Keep costs low for consumers
- Mandates need to apply to all utilities

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)
- Utilities should have cost recovery
- Keep costs low for consumers
- Mandates need to apply to all utilities
- Rural and Muni's have surplus supply
 - Do not want to put farmers out of business

Utah Issues

- Need to address external costs
- Growing load (need 1300 MW)
- Utilities should have cost recovery
- Keep costs low for consumers
- Mandates need to apply to all utilities
- Rural and Muni's have surplus supply
 - Do not want to put farmers out of business
- Allow for renewables system-wide (ex. WY wind)

Utah Issues
